A word about the ERD initiative

The European Report on Development (ERD) is the main output of the “Mobilising European Research for Development Policies” initiative, supported by the European Commission and seven EU Member States (Finland, France, Germany, Luxembourg, Spain, Sweden & United Kingdom). The ERD is an independent research report, prepared by some of the leading EU development academics and research institutes. The first ERD dealt with the topic of fragility, and the second of social protection. The third edition of the ERD, entitled “*Confronting scarcity: managing water, energy and land for inclusive and sustainable growth*”, will be launched in May 2012.

The ERD 2012-2013 is being prepared by a team led by the Overseas Development Institute (ODI) in partnership with the German Development Institute (DIE-GDI) and the European Centre for Development Management (ECDPM).
